

# Production Order Status Error Codes

The error numbers and corresponding descriptions listed in the table below are returned in the ProductionOrderStatus XML message in the "ErrorCode" attribute of the "Status" element.

100	Invalid media field	312	Image file open error
103	Invalid target line	313	Image file read error
123	Invalid input bin	314	Job file rename error
124	Reserved input bin empty	315	Production order was cancelled
125	No Un-reserved input bin available	316	Order cancelled because required password was not entered
126	Invalid mailslot	325	Job log (or Performance Track database) error
127	No reserved mailslot available	334	Label Merge file not found
128	No un-reserved output bin available	335	The CD-R Label Editor could not be invoked to print a label
129	Missing message property	336	Image file write error
130	Message attribute and XML order attribute are different	337	ISO9660 image size check failed
204	Undefined label type	338	Program for printing CD Designer label not found
205	Unable to open image file	339	System failed to generate the required label for printing
206	Error reading image file	340	Merge file for label has insufficient number of records
208	Media type was different than specified in the order	341	Unable to open image file (logon required)
211	Features specified by order are not available	342	User Type specifies use of ModifyDisc.DLL which wasn't loaded
216	Label file specified in order not found	343	Job cancelled by the ModifyDisc.DLL
217	Inconsistencies between order records	344	Image is too large to fit on the specified media
221	Label file format incompatible with specified label type	345	The production order was cancelled via the API
222	More than 99 tracks were specified	400	Order was cancelled by the server program
226	Only a single record action is allowed for a DDP order	401	Job paused on hardware error, may resume later
227	Unable to open the DDP-ID file	402	Order was cancelled because of too many retry attempts
228	Error reading the DDP-ID file	403	Duplicate Order IDs found
229	Unable to open the DDP-MS file	404	A segmented order isn't recoverable at start-up
230	The DDP-MS file contains too few records	405	A segmented order failed recording on the 2 <sup>nd</sup> or greater segment
231	Unsupported type in the DDP-MS file	500	Track Map file open error
232	Unable to open the DDP-PQ file	501	Track Map file write error
233	Error reading the DDP-PQ file	502	Track Map file read error
234	An un-supported DDP feature is specified	503	Error getting track map info from disc
235	DSS doesn't match index 0 subcode record in DDP	504	Invalid track type for reading the PVD
236	Read parameters missing on a read order	505	Track number to read doesn't exist in track map file
300	Label file not found (after job processing started)	506	Disc was packet-written, not copyable
301	Job file read or sequencing error	507	Failed to load disc for reading, hopper empty
302	Job file write error	508	Failed to load disc for reading
303	Temporary file open or memory allocation error	509	Destroy operation failed in a 'read' order
304	Temporary file read error (cache drive on CD-R system)	600	Power image file size changed between imaging and downloading
305	Temporary file write error (cache drive on CD-R system)	601	Unable to open power image file
		602	Error reading a power image file
